

Lotus crystal

INDUSTRIAL TOURISM

Observe and experience the complete crystal-making process at Thailand's only crystal manufacturing factory.

CRYSTAL PRODUCTION

Welcome to Lotus Crystal production, the process start by melting the **Raw materials** overnight. Then in the morning, we starts forming the piece by blowing, stem pulling and foot making.

Boiling

Forming

Blowing

Heating

Stem Pulling

Foot Making

After the forming process, the piece will cool down in the annealing machine. Next, the piece will refine rim cutting and fire polishing. At last, we cleans up the piece and pack it.

Annealing

Rim Polishing

Washing

For cut glass, the piece will send to grinding section to make a cut and sparkle the cutted marks up again by acid polishing.

Furthermore, we have an engraving section to create the beautiful engraving piece as well.
